1. General Use Guidelines

The Map Collection of the Texas/Dallas History & Archives Division contains over 7,000 maps, atlases, and related cartographic materials covering nineteenth-century Mexico and Texas from approximately 1800 to the present, as well as Dallas from 1846 to the present. Types of maps include original as well as reproduction maps, roads maps, thematic maps, and older topographic maps (current topographic maps may be found on the sixth floor).

Maps are only used on the seventh floor at the public area desks.

Generally **three maps will be brought out at any one time for a given request**, due to the length of time it takes to retrieve a map. If more than three maps are needed, after the first three have been examined the librarian on duty will retrieve the next set.

Maps are large and sometimes fragile objects. They should be **laid flat on a table and treated gently**.

Due to their fragility, **in-house photocopying of the maps is prohibited**. Many of the maps in the collection, however, have Mylar copies (see Sections 8 and 9), and copies of these maps can be obtained for a fee. The process takes one to three working days. Please see the librarian for further details.

2. The Map Collection Indexes

There are three indexes to the maps in the map collection. These printed indexes are available at the reference desk.

- ❖ The **place order index** provides a list of all maps in alphabetic order by geographic area of coverage. Typically, the geographic area entered will be a city or county name, but some names that have regional boundaries such as the Peters Colony of Texas are found, as well as some specific urban neighborhoods or subdivisions.
- ❖ The **subject order index** provides a list of all maps in alphabetic order by subject. Maps for which more than one subject entries have been assigned will be listed under multiple headings. Subject entries may be multi-faceted, with general terms preceding more specific terms such as “Roads--Galveston” or “Zoning Maps--Dallas.”
- ❖ The **title order index** provides an alphabetical list of all maps by title.

When requesting a map, please specify the map number and its location. Please note that if a map is flagged with “Use Mylar Copy!” in the upper left corner of the record, the **Mylar copy of the map must be used for general research**.

3. Information About the Map Collection Indexes

The following diagram illustrates the appearance of an entry in the place order index (this is a fictional entry). The various parts of this index are described below.

Dallas

Official Map of Dallas, Texas (1875)

Use Mylar Copy!

Map 48 (map case 2, drawer 2)

Subjects: Roads--Dallas; Railroads--Dallas

Inset: Dallas downtown map. Includes street index. Verso: Insets: Map of Dallas and vicinity. Includes miscellaneous photos and facts. Cover title: "This is Dallas."

Group Heading

The place order and subject order indexes will have a gray bar with the main headings provided in bold text. For the place order index, the geographic area of coverage will appear in this heading level. For the subject order index, the subject entry will appear in this heading level. The title order index has no group heading since it is a simple alphabetic list of all maps.

Title

The title of each map appears under the group heading **in chronologic order**, and there under in alphabetic order. The title is in bold and flush left, and the date depicted by the map appears in parenthesis after the title. Note that the date is not necessarily the date of publication. In general, a map that covers a range of time (such as the post offices in a city from 1850 to 1875) will be given a date of 1850 to reflect the earliest period of coverage.

Map Number

The map number appears below the title, indented slightly. General historic maps have no letter prefix, but many maps in the collection have a prefix designating the type of map. Definitions of these prefixes are provided in Appendix A. **Please provide the map number to the staff when requesting a map.**

Following the accession number in parentheses is the location of the map, for staff use. The location generally provides case and drawer numbers. Some maps have no case and drawer number because they are stored in special locations. **Please provide the location to the staff when requesting a map.**

Subjects

Subjects associated with the map are listed to the right of the map number. One or more subjects may be associated with each map.

Notes

Many maps have general notes in the record relating miscellaneous information about the content of the map, its coverage, or other information that may be useful to researchers. This information appears immediately above the thin line indicating the end of the map record. If there are no notes for a map record, the end-of-record line will appear immediately below the map number and subjects list.

Use Mylar Copy!

If a Mylar copy of the map has been made, a note to use the Mylar copy appears in the upper right of the record. **The Mylar copy will need to be used for maps that have them.**

4. Related Resources

Atlases and Tax Assessment Information (Seventh Floor)

The Texas/Dallas History & Archives division owns many atlases and sets of tax information records that are not cataloged in the Map Collection database or listed in the Map Collection indexes. See Appendix D for a description of these resources.

Maps in the Government Information Center (Sixth Floor)

The library's overall Map Collection is located on the 6th floor of the Central Library In the Government Information Center. This collection includes:

- ❖ Over 20,000 maps, gazetteers, geographic and thematic atlases.
- ❖ Current topographic maps for the entire U. S. and Mexico (Texas/Dallas in contrast receives older and outdated Texas maps from the sixth floor).
- ❖ Maps dealing with oil and gas, coal, geological formations, national parks and recreation areas.
- ❖ Current voter precincts, justice of peace and city council districts, etc. Also large hanging maps of Dallas and Tarrant counties (in the Urban Information section).

Maps in the Nancy and Jake L. Hamon Oil and Gas Resource Center (Fifth Floor)

There is a small collection of maps and atlases related to the energy industry on the fifth floor of the library. These maps focus on resources in Texas, but also broadly cover North America.

Map-Related Books in the Texas/Dallas History & Archives Collections

All books in the Texas/Dallas History & Archives collections are reference use only and must be retrieved by library staff stacks unless otherwise noted at the end of the call number.

Arbingast, Stanley A., et al. *Atlas of Texas*. 5th ed. Austin: University of Texas. Bureau of Business Research, 1976. R912.1 A664A 1976. DESK FLAT.

- ❖ Contains maps and tables on physical, cultural, historical, demographic, and statistical topics.

Atlas of Major Texas Gas Reservoirs. Chicago: Gas Research Institute; Austin: University of Texas at Austin. Bureau of Economic Geology, 1989. R553.285 A881. OVERSIZE FLAT.

- ❖ Detailed maps and information on Texas natural gas reservoirs.

Atlas of Major Texas Oil Reservoirs. Austin: University of Texas at Austin. Bureau of Economic Geology, 1983. R912.15532 A881. OVERSIZE FLAT.

Atlas to Accompany the Official Records of the Union and Confederate Armies. Vol. 2. Washington: U. S. War Department, 1891–1895. R973.7 U58WW. OVERSIZE FLAT.

- ❖ Color maps showing civil war battlefields. Volume is in poor condition with missing pages. **Use the 1978 reprint** in History and Social Sciences, *The Official Military Atlas of the Civil War*, R911.73 U58O 1978 (Oversize).

Beck, Warren A., and Haase, Ynez D. *Historical Atlas of the American West*. Norman: University of Oklahoma Press, 1979. R911.78 B393H 1989. DESK.

- ❖ Black and white historical and thematic maps of the American West, with detailed explanations on the page facing each map.

Bryan, James P., and Hanak, Walter K. *Texas in Maps*. Austin: University of Texas, 1961. R911.764 B915T.

- ❖ Delineates the history of mapmaking in Texas to 1867, with black and white map reproductions.

Cartographic Records of the Bureau of Indian Affairs. Washington: National Archives, 1977. R016.91273 U58C 1977.

- ❖ Annotated list of maps of the Bureau of Indian Affairs, arranged by bureau division and then by state.
- ❖ Includes an index that may be used to locate individual tribes.

Cartographic Records of the National Resources Planning Board. Washington: National Archives, 1977. R016.912 U58C.

- ❖ Describes federal map holdings concerning national resources for the entire country.
- ❖ Arranged by central office records and regional office records, and includes maps of Texas.

Civil War Maps: An Annotated List of Maps and Atlases in Map Collections of the Library of Congress. Washington: Library of Congress, 1961. Reprinted 1977 by Sterling Press, Falls Church, Va. R016.9121 U58C 1977.

- ❖ Arranged by state; only includes one Texas map.

Civil War Maps in the National Archives. Washington: National Archives, 1964. R016.97379 U58NC.

- ❖ Describes approximately 8,000 maps, charts, and plans pertaining to the Civil War, including sections on Texas.
- ❖ See also the **1986 edition** on the eighth floor Genealogy Division: R016.91173 G946 1986.

County Maps of Texas. Austin: Texas Department of Highways and Public Transportation, 1982. R912.764 T355C. DESK FLAT.

- ❖ Two-color maps showing lakes, highways, rivers, and other features.
- ❖ Covers all Texas counties.
- ❖ **For the most current edition** published under the Texas Department of Transportation, see the map collection in the Government Information Center.

Cram, George S. *Cram's Superior Reference Atlas: Texas: the Great Southwest*. New York: Cram, [1910?] R912.764 C889C. OVERSIZE FLAT.

- ❖ An edition of a world atlas that devotes its first half to textual information about Texas.

Crossroads of Empire: Early Printed Maps of Texas and the Southwest, 1513–1900. Fort Worth: Amon Carter Museum, 1981. R912.764 C951.

- ❖ Describes 52 maps that formed an exhibit at the Amon Carter Museum.

Cumming, William P. *The Southeast in Early Maps*. Chapel Hill: University of North Carolina Press, 1962. R526.8 C971S2.

- ❖ Traces the history of mapmaking in the southeastern United States and gives an annotated checklist, with black and white reproductions, of printed and manuscript maps for that area.
- ❖ Only tangentially related to Texas.

Day, James M. *Maps of Texas, 1527–1900*. Austin: Pemberton Press, 1964. R016.912764 D274M. DESK.

- ❖ Describes 2,065 maps in the Texas State Archives.
- ❖ Entries are arranged in chronological order with annotations.

Ellis, L. Tuffly, et al. *Cultural and Historical Maps of Texas from the Atlas of Texas*. Austin: University of Texas at Austin. Bureau of Business Research, 1976. R912.764 E47C. OVERSIZE.

- ❖ A subsection of maps from the Atlas of Texas dealing with demographics, religion, explorations, ethnic groups, railroads, and other cultural and historical factors.

Exploration and Mapping of the American West: Selected Essays. Chicago: Speculum Orbis Press, 1986. R912.78 E96 1986.

- ❖ Essays published for the Map and Geography Round Table sessions of the American Library Association, tracing the history of the mapping of the West.
- ❖ Includes black and white map reproductions.

Fire Insurance Maps in the Library of Congress: Plans of North American Cities and Towns Produced by the Sanborn Map Company. Washington: Library of Congress, 1981. R016.91273 L697F.

- ❖ A checklist for the entire U. S. series of Sanborn maps and atlases.
- ❖ Provides a valuable historical record of urban growth in the United States over more than a century.

Frantz, Joe B., and Cox, Mike. *Lure of the Land: Texas County Maps and the History of Settlement*. College Station: Texas A & M University Press, 1988. R911.764 F836L 1988. OVERSIZE FLAT.

- ❖ Facsimile maps in color depicting, by area of Texas, the settlement of Texas counties.

Gannett, Henry. *A Gazetteer of Texas*. Washington: Government Printing Office, 1904. R910.3 G198G.

- ❖ Dictionary of place names for Texas at the turn of the century, with statistical information of that time.

Historic Texas Maps Datebook, 1985. Richardson, Texas: Herring Press, 1984. R976.4 G814H.

- ❖ Although in the form of a datebook, gives full color reproductions of 25 historic Texas maps.

Jordan, Terry G., et al. *Texas: A Geography.* Boulder, Colorado: Westview Press, 1984. R917.64 J82T. DESK.

- ❖ Maps and text describing all facets of Texas, including physical, demographic, cultural, linguistic, agricultural, and political.

Ladd, Richard S. *Maps Showing Explorers' Routes, Trails, & Early Roads in the United States: An Annotated List.* Washington: Library of Congress, 1962. R016.912 U58LMM.

- ❖ List of 300 maps covering the U. S. Color map shows major explorations from 1501 to 1844.

Lake Atlas: Texas. Arlington, Texas: Marlake, 1984. R912.179911 M347L 1984. DESK FLAT.

- ❖ Shows Texas lakes, routes to lakes, and information about hunting, fishing, and other outdoor sports.

Land Ownership Maps: A Checklist of Nineteenth Century United States County Maps in the Library of Congress. Washington: Library of Congress, 1967. R016.91273 L697L 1977.

- ❖ Records of 1,449 U. S. county land ownership maps, arranged alphabetically by county or area within each state.

Mapping of the American Southwest. College Station: Texas A & M University Press, 1987. R912.76 M297 1987.

- ❖ History of the mapping of the Southwest, from Spanish and French colonization through the nineteenth century, illustrated by numerous map reproductions, some in color.

Martin, James C., and Martin, Robert Sidney. *Maps of Texas and the Southwest, 1513–1900.* Albuquerque: University of New Mexico Press, 1984. R912.764 M381M.

- ❖ Summarizes the growth of the geographical knowledge of Texas over a period of four centuries; includes black and white and color reproductions.

Martin, Robert Sidney, and Martin, James C. *Contours of Discovery.* Austin: Texas State Historical Association, 1981. R912.764 M382C. Located on top of map case 7.

- ❖ Unbound reproductions of twenty-two maps of Texas and the Southwest covering the period 1513–1930.

Martin, Robert Sidney, and Martin, James C. *Contours of Discovery: Printed Maps Delineating the Texas and Southwestern Chapters in the Cartographic History of North America, 1513–1930: A User's Guide.* Austin: Texas State Historical Association, 1982. R912.764 M382C.

- ❖ A history of mapmaking in Texas and the Southwest, with detailed annotations on the 22 maps in *Contours of Discovery*.

Meinig, D. W. *Imperial Texas: An Interpretive Essay in Cultural Geography.* Austin: University of Texas Press, 1969. R301.29764 M514I. DESK.

- ❖ Discusses the growth and nature of the “empire” of Texas from its beginnings to the present; illustrated with black and white thematic maps.

Modelski, Andrew M. *Railroad Maps of North America: The First Hundred Years*. Washington: Library of Congress, 1984. R912.1385 M689R 1984. OVERSIZE FLAT.

- ❖ Ninety-two map reproductions (representing 5,000 railroad maps in the Library of Congress), mostly black and white, illustrating the history of North America's first 100 years of railroad mapping.

Old Map Collection of the General Land Office. Austin: Texas General Land Office, 1975. R016.912 T355O.

- ❖ Includes descriptions of maps of Texas, colony and district maps, town and city maps, maps of Texas and Pacific Railway Company lands, and other miscellaneous maps held in the General Land Office.
- ❖ Many General Land Office maps have been digitized and are available at <http://www.glo.state.tx.us/archives/mapscol.html>

Ouzts, W. Glenn. *Land Use/Land Cover Maps of Texas*. Austin: Texas Department of Water Resources, 1977. R912 O95L. OVERSIZE FLAT.

- ❖ Maps developed to comply with 1972 federal water pollution requirements, using Army Mapping Service 1:250,000 scale topographic maps.

Pool, William C. *A Historical Atlas of Texas*. Austin: Encino Press, 1975. R911.764 P821H. DESK.

- ❖ Historical and thematic maps of Texas to 1960.

Potts, Frances E., et al. *Texas in Maps: An Atlas for School and Home*. Commerce: East Texas State University, 1966. R912.764 P871T. OVERSIZE.

- ❖ Color maps and tables showing physical, agricultural, industrial, and demographic information.

Rand McNally Commercial Atlas and Marketing Guide. Chicago: Rand McNally, current year. R912 R187R. DESK (large bound volume by dictionary).

- ❖ Contains large color maps and a detailed index for each state, as well as marketing, demographic, and other business data.
- ❖ Texas/ Dallas owns most editions back to 1948. The 1948 edition is in the oversize flat area.

Rand McNally's Pioneer Atlas of the American West. Chicago: Rand McNally and Co., 1956. R917.8 R187P. OVERSIZE FLAT.

- ❖ Contains facsimile reproductions of maps and indexes from the original 1876 edition.

Rosenberg Library. *Cartographic Sources in the Rosenberg Library*. College Station: Texas A & M University Press, 1988. R016.91276 R813C 1988.

- ❖ Describes 558 maps held by the library, focusing on Galveston, the Gulf of Mexico, the Caribbean Sea, and adjacent coasts.

State Maps on File: Texas. New York: Facts on File, 1984. DESK (black ring binder).

- ❖ Twenty-six 8 1/2" x 11" historical and thematic black and white maps, arranged for ease of photocopying; part of a larger set for the entire country. See also R912.73 F142 S in the Map Collection in the Government Information Center.

Stephens, A. Ray, and Holmes, William M. *Historical Atlas of Texas*. Norman: University of Oklahoma Press, 1989. R911.764 S832H 1989. DESK.

- ❖ Black and white historical and current maps arranged in chronological order, with a detailed explanation for each map on the facing page.

Tarpley, Fred. *1001 Texas Place Names*. Austin: University of Texas Press, 1980. R917.64 T191O. DESK.

- ❖ Alphabetical list of Texas place names with explanations of their origins.

Terrell, John J. *Mileage Table Number 1971*. Austin: Terrell, 1972. R912.764 T325M 1971.

- ❖ Shows mileage between any two points in Texas by routes wholly within the state.

Texas A & M University. Cartographics Laboratory. *The Roads of Texas*. Fredericksburg, Texas: Shearer, 1988 and 1995. R912.764 T355R 1988. OVERSIZE. R912.764 T355R 1995. OVERSIZE.

- ❖ Detailed color highway maps showing distances between points, with the state divided into seventy-eight rectangular map sections.

Texas Gazetteer. Wilmington, Delaware: American Historical Publications, 1985. R917.64003 T355. DESK.

- ❖ Historical gazetteer giving detailed information on events, places, and people in Texas, also serving as a source of reference data of frequent interest.

Texas Surveyors Association. *One League to Each Wind: Accounts of Early Surveying in Texas*. Austin: the Association, [1964] R526.9 T355O.

- ❖ A history of early surveying in Texas, including accounts of pioneer surveyors as well as biographies of early surveyors.

Tooley, R. V. *Maps and Map-Makers*. 6th ed. New York: Crown, 1978. R526.809 T671M 1978.

- ❖ A general study of the history of cartography, utilizing black and white map reproductions.

Van Zandt, Franklin. *Boundaries of the United States and the Several States*. Washington: U. S. Government Printing Office, 1966. R911.73 V285B. DESK.

- ❖ Detailed delineations of the boundaries of the United States and each state.

Wheat, Carl I. *Mapping the Transmississippi West, 1540–1681*. San Francisco: Institute of Historical Cartography, 1957. 5 vols. R912.78 W556M. OVERSIZE.

- ❖ A history of the mapping of the West, accompanied by numerous black and white map reproductions.

Appendix A—Accession Number Prefixes

Accession Number Prefixes (Series Designations) and Their Definitions

<i>Prefix</i>	<i>Designation</i>	<i>Notes</i>
None	General Historic	Most of these maps are encapsulated. They are located in map cases 2 and 3.
C	County Land Grants	Located in map case 4.
G	Topographic	These are maps that have been removed from the current maps collection on the sixth floor, which maintains a collection of current topographic sheets. Map cases 3 and 4.
H	General Highway	These are Texas Highway Department county maps. Map cases 4 and 5.
HM	Medium Highway	These are general highway maps printed in medium-size formats.
L	Large Historical	These are the large sheets. They are difficult to work with. Map case 10.
LF	Large Folded	Map case 10.
M	Medium Historical	Map case 9.
MC	Mylar Copy	These are Mylar sheets that are copies of maps from other sources (not owned by the Dallas Public Library). If an original is acquired, the MC record should be deleted, and the record for the original should indicate that a Mylar copy is available.
P	Rare and Fragile	These are maps segregated because they are either particularly rare or fragile. Map case 4.
R	Rolled	These maps are generally very large, and are rolled, most stored in tubes. Many are vinyl coated cloth.
T	Texas City	These are folded maps stored in vertical files (map case 7). Most are standard street maps.
TP	T&P Ownership	These are Texas & Pacific Railway Company maps showing land ownership. Map case 9. See also archives collection MA79-3.
V	Vertical File	These are folded maps stored in vertical files (map cases 7 and 8). Most are standard street maps covering cities, counties, and the state.
Z	Other Maps	These are bound materials, atlases, items in the library catalog, and miscellaneous items.

Appendix B—Ordering Map Copies

Maps may be copied for a cost based on the square footage. For the cost per square foot, see the Map Ordering Form (Appendix F).

For maps that have been reproduced on Mylar, each map's square footage and total price is shown on the list attached to the order form and in the database. In general, only maps reproduced on Mylar are available for photocopying. Due to their fragile nature, most maps that have not been reproduced on Mylar are NOT available for copying. Some paper maps may be sturdy enough to be copied. Suitability for copying should be determined by the map librarian. Any map that can be copied may also be scanned and burned to CD. For costs, please see the Map Ordering Form (Appendix F).

Turnaround time is generally one to three working days. Under no circumstances can a patron take a map out to another business for copying. In some cases a patron may be able to photograph a given map (print or slide film) if it is not copyrighted. No map will be removed from its encapsulation for copying or for any other purpose.

To order maps, first the patron selects map or maps to be ordered, and the cost is calculated. Please note the minimum cost and any postage, mail delivery, and other charges. The patron must pay for the order before it is called in. The staff member taking the order should give the patron a receipt for proof of purchase.

Fill out the Map Order Form (obtain from pouch in the map manual). If the patron wants a copy of the completed form, make them a copy at the copy machine. Give the form, attached to the desired Mylar map(s), to the map librarian for further processing.

Prepare the order form for the vendor who is providing copy services. Be sure to include the current library requisition number and the library organization number (5340) on the order form. Place the Mylar map or maps in the flat archival box, then place the box with the vendor's form attached to the front by the service desk for pickup. All the materials, both Mylar maps and paper copies, should be returned to us.

Upon delivery by the vendor, call the patron for pickup or mail the copies. Be sure to separate the Mylar maps and return them to map case 1.

Have the department manager sign and date the vendor's invoice, then forward the invoice to the Dallas Public Library Business Office for payment. Note the amount of the payment on the encumbrance form.

Appendix C—Frequently Used Subject Headings, Notes, and Abbreviations

Subject Headings

All in this list are Library of Congress Subject Headings (as of September 2007) except those marked with an asterisk (*).

Frequently Used Terms and Abbreviations

ENCAPSULATED WITH: indicates named map is encapsulated with other maps

INCLUDES: indicates lists of useful indexes or other information on the map

INSET(S): indicates smaller inset maps showing with the main map

MOT: *Maps of Texas*, by James M. Day, R016.912764 D274M (CTX desk)

OBVERSE: indicates any items included on the back of the map

OVERSIZE: indicates the location is the oversize section

OVERSIZE FLAT: indicates the location is the oversize flat section

POOR CONDITION: indicates the map is not stable enough to be made available in general

PUBLISHED: indicates the date the map was created if it differs from the year of coverage

REPRINT: indicates the date of a new printing

REPRODUCTION: indicates the date of other forms of reproduction

SEE ALSO: refers to related maps or materials

TEXT IN: notes the language used on the map if other than English

Wheat: *Mapping the Transmississippi West*, by Carl L. Wheat, R912.78 W556M

Appendix D—Atlases

Chronological Index of Atlases

Index **location references generally follow the format [range]/[row]/[shelf]**. You may use that reference to find the more detailed description for the atlas (which follows this index). **Microfilm location references follow the format Reel [reel number]**. Atlases that are revised are listed under the revised date or original and revised dates, as appropriate to the content of the atlas. In some cases earlier versions may also be available online, and that availability is noted. Atlases that cover a range of years are listed under each year covered. The notation **(use microfilm)** indicates the microfilmed version of the atlas should be used. If the notation includes a number such as **(use microfilm, 10)**, this indicates reel 10 of the appropriate microfilm set should be used. The notation **(microfilm)** indicates the item is only available as microfilm. The notation **(online)** indicates a digital version of the atlas is also available.

<u>General Reference</u>	<u>range/row/shelf or reel</u>
<i>Guide to real estate and plat atlases.</i>	1/4/1
<u>1800s–1986</u>

Shelf Description

The following is a list of the atlases that the Texas/Dallas History & Archives Division owns, listed by location. Any of these that are available on microfilm should be used in that format instead of the paper format. The following provides a shelf list of atlases, followed by an index of atlases by year

Range 1

Row 1

Shelf 1 *Rand McNally & Co.'s Indexed Atlas of the World, Historical and Descriptive.* Chicago: Rand McNally, 1886.

- ❖ Item is in very poor condition

Shelf 2 *Rand McNally Commercial Atlas & Marketing Guide.* Chicago: Rand McNally.

- ❖ 1954, 85th edition.
- ❖ 1963, 94th edition.
- ❖ 1987, 118th edition.

Shelf 3 *Nirenstein's Real Estate Atlas of the Solid South. Vol. II.* Springfield, MA: Nirenstein's National Realty Map Company, 1951.

- ❖ Contains tract maps, aerial views, and photographs of the entire downtown retail shopping districts for Amarillo, Austin, Beaumont, Dallas, El Paso, Fort Worth, Galveston, Houston, San Antonio, Waco, and Wichita Falls.

Appendix E—Map Collection Database

The map collection database is located in the folder W:\Maps and Posters\MapDatabase and is called “maps.mdb.” The data entry form will automatically open to the first record in the database. At present, this database is staff use only, but an online, publicly accessible version is being planned.

Accession Number

Accession Number Prefix—The accession number prefix is left blank for general historic maps, and is one of the prefixes listed in Appendix A for other types of maps. The prefix may be thought of as indicating the series of a set of maps within the overall collection.

Large maps are generally designated as series L, M, or R. These are oversized or rolled maps. Due to the difficulty handling these maps, they should be consulted only after the resources of the regular map collection have been exhausted. Since these maps by their nature are difficult to retrieve and display, please make an appointment with a librarian to see these maps.

Rare and fragile maps are designated as series P. These maps are listed in the map indexes, but care should be taken when using these maps. If a patron wishes to see one of these maps, they may view only one P-series map at a time and the use should be supervised. These maps are never photocopied, although a patron may make photographs if they do not use a flash.

Accession Number—The accession number is a sequential numeral assigned incrementally as maps are added to the various series.

Accession Number Suffix—The accession number suffix is an addition to the Accession Number that may be used with several related maps are assigned the same accession number to indicate their close relationship. For example, the majority of the United States Geologic Survey 15-minute topographic sheets are assigned the number 77, and individual sheets are distinguished by a two- to four-digit alphabetic suffix derived from the title of the map.

Copy—The copy segment of the accession number indicates whether the map is a duplicate of a sheet that otherwise has the same accession number (prefix, number, and suffix).

Title

The map title should be given exactly as given on the map. If no title is present on the map, a descriptive title should be provided, followed by the phrase “[supplied title].”

Location

Map case and drawer—These give the storage location of the map. The cases and drawers are all numbered.

Description

Year—The year is the year represented by the map rather than the year it was published. A map published in 1975 as a reprint of a 1911 map should have 1911 entered in this field. A map drawn in 1956 and revised in 1973 should have 1973 entered in this field. Maps that reflect change through time should have the earliest date represented entered in this field; information in the title or notes fields should indicate the range of time covered. (**Note:** The year has not been consistently entered into this field through time, and there may be some dates that do not adhere to this description.)

Date approximate—This checkbox indicates whether the date is an estimate (checked) or is known (unchecked). If the box is checked, the date will be preceded by “ca.” in reports.

Geographic coverage—This field is for a named geographic area of coverage. This could be a city, county, a geographic region such as Northeast Texas (seldom used), or a broad region such as Texas or Mexico. (**Note:** For USGS topographic quadrangles, generally the most prominent county is listed here. Other counties shown on the sheet, if any, are listed in the Notes field.)

Region of coverage—This field describes the type of coverage as nation, state, region, county, or city. These are general descriptions reflecting the scope of coverage. (**Note:** USGS topographic quadrangles that cover an area within a single county are marked as county, but if they cover more than one county they will be keyed as region.)

Author—Provide the author as shown on the map. This refers to the creator of the map or the illustrator, engraver, or other contributor to the item.

Publisher—The person or agency responsible for the publication of the map. Abbreviations should be spelled out, so use United States Geological Survey instead of USGS (**Note:** Abbreviations have been inconsistently used in the past and the data is in the process of being corrected.)

Subjects—There are three fields for subjects. It is strongly advised to use subjects that have already been entered if possible instead of creating new entries. (**Note:** The subject entries are in the process of being simplified, after which greater control will be placed on subject entry. See Appendix C.)

Scale—Most scales are given in the format “X” = X feet” or miles. Some are given in the USGS-preferred format of a ratio such as 1:24,000.

Size—The size refers to the dimensions of the map, in centimeters, measured to the size of the image, not the size of the paper on which the map is printed. The vertical measure is given first, followed by the horizontal.

Color?—This field is checked if the map is in color.

Encapsulated?—This field is checked if the map is encapsulated in Mylar.

Mylar copy?—This field is checked if the map is reproduced on Mylar. When checked, the Mylar copy should be pulled from map case 1, and the original should not be pulled except under special circumstances. If checked, a square footage should also be entered below this field, from which the price of a copy may be calculated.

Deacidified?—This field is checked if the map has been treated to neutralize acids. A note in the preservation field may provide information about date and type of treatment.

Nylon backing?—This field is checked if the map has been treated for deterioration by adding backing for strength.

Mounted?—This field is checked if the map has been mounted.

See verso?—This field is checked if printed on both sides. In some cases, a separate record has been entered for the verso map. The notes field may contain additional information.

Have Negative?—This field is checked if the Texas/Dallas History & Archives Department has a photographic negative of the map.

Scanned?—This field is checked if the map has been scanned.

Annotations

Preservation note—Information related to treatments needed or taken is entered in this field.

Source citation—If the map has been removed from another document such as a book, the source should be provided here. The source should be provided as a full bibliographic citation. (**Note:** Many of the courses are provided in an abbreviated form. These are in the process of being updated.)

Other notes—This section is for general notes about the resource.

Value

There are two fields available for value-related information. The Value field is for the value of the resource, and the Value Note field is for notes related to that valuation. This information is not available to non-staff persons.

Appendix F—Staff Guidelines

The following are general guidelines for staff to follow regarding patron use of maps.

- ❖ Staff should remind patrons that maps need reasonably gentle treatment.
- ❖ Use of maps should be supervised (insofar as that is possible when on the desk), especially concerning the prohibition against photocopying.
- ❖ Staff should know how to take a Mylar map order, calculating the cost, filling out the first form and giving the order to the map librarian.
- ❖ Staff can certainly bring out more than three maps at a time if they think that will be easier all around. But it does take some time to get maps out of their map cases.
- ❖ Procedures for getting maps out of small gray map cases:
 - Do not jerk single maps out of their folders while the folders are still in the map case. Go to the blank “table” (of empty boxes nearby) with the entire folder containing five or six maps.
 - Pull the desired map and transfer it to the transport folder, located on top of the main map cases. Leave the main folder (which you got the map from) on top of the map case for easy refileing later.
 - Use the transport folder to bring 3 maps out at a time.
- ❖ Procedure for the M and L series in Map Cases 9 and 10:
 - Pull all folders above the desired one, place on adjoining table.
 - Pull entire desired folder and place on the previously pulled folders.
 - Open folder and pull desired map out, transfer to transport folder, and bring out in the transport folder. There is no way you can just jerk one map clear while it is still in the drawer and its folder; these maps are too heavy and awkward, and will be damaged in the attempt.
 - When the patron is done, simply place the map on top of the pulled folders. The map librarian will refile it.
- ❖ Paper reproductions of any map not reproduced on Mylar may be made if the map is in good enough condition. This involves sending the original map out of the building, which we would not want to do with any rare or fragile map. Send any requests for these to the map librarian, who will consult with the reprographics vendor and decide whether a specific item can be safely copied. The final authority whether or not a copy is made rests with the map librarian.
- ❖ Map indexes are located at the reference desk. Indexes are by place, subject, and title.

Appendix G—Processing Maps

- ❖ Determine the category (see the Accession Number discussion in Section 4).
- ❖ Property stamp on obverse of map (or in the case of rare maps, on a slip of acid free paper to be encapsulated with the map).
- ❖ Assign accession number based on the category. The next available number may be determined by moving to any record in a given category in the database and clicking the “Next Num” button on the right side of the form. A maximum number will be located in the database for that prefix and a message box will provide the next number beyond the highest number found.
- ❖ Determine whether a subdivision or secondary designation (suffix) is needed. If the prefix and accession number match a record already in the database, a suffix to that number should be added to distinguish between the two records. All suffixes are separated from the main portion of the accession number by a period, so the resulting accession number will read as, for example:
 - H57.A
 - H57.2
 - H57.2a
- ❖ Maps from other sources:
 - Maps from archive collections are assigned map accession numbers, and the archive collection reference (including the collection, box, and folder numbers) is noted in the source citation field and on the map itself (or a slip of acid free paper encapsulated with the map).
 - Maps retrieved from books for better preservation are assigned accession numbers, and the source reference (including call number) is noted in the source citation field and on the map itself (or a slip of acid free paper encapsulated with the map).
- ❖ Write the complete Accession Number on the map with a number two pencil. The placement of the number should be such that it is easy to see when the map is stored. Generally, this will be in the lower right corner.
- ❖ Fill out worksheet. Measure size at this time. If the map is bordered by lines set into the sheet, the measurements are of the area within the lines, not the entire sheet. Use Maps of Texas or other sources of information about the map in question.
- ❖ Encapsulate the map. Exceptions may be made for maps that are common or readily available such as topographic sheets.
- ❖ Store map in appropriate map case or otherwise.
- ❖ Add the map to the maps database.
